THE BATH MAKERS

bcdesigns

JANUARY 2021

Discoveryour perfect bath

Welcome to the BC Designs January 2021 brochure! We have been busy designing and expanding our product ranges so we are able to offer luxury to everyone, no matter your space.

Our ColourKast range of baths continue to inspire some very colourful spaces and we have seen a huge demand for our different brassware finishes on our lever and crosshead tap range. We have added a couple of new bath models while we work on new designs, including our simply perfect Tamorina (Page 68) and traditional Tye Shower bath (Page 24). We have also added Copper basins to our popular Copper Boat bath range which come in all our standard finishes, Copper, Nickel and Tin. We hope you like our latest product instalment - there is much more to come!

"Our focus is on timeless, authentic design that holds its own in the bathroom market"

Copper Boat

An original design by Barrie Cutchie, available in four finish combinations.

Our Copper Boat Baths are made in the traditional hand crafted manner used for centuries, and therefore there will be gentle undulations and some colour variation in the finish so every bath is unique to you. Copper Baths are excellent heat conductors and will maintain the water temperature much longer than Cast Iron versions. Even after the bath has been emptied it will remain warm to the touch.

Important

Copper

Our Copper baths have a hand polished finish, so there will be undulations and imperfections in the surface. This is part of the character of the baths and should be expected before ordering. The copper will start to age over time and gain its own particular patina. Cleaning should only be done with a very mild soap solution and a soft cloth. De-scaling liquids such as Cillit Bang, Viakal etc should never be used.

Polished Nickel

The Polished Nickel finish is electroplated on the bath giving a beautiful shiny finish which will develop its own character over time.

Overflow & drilling

BC Designs Copper Baths are supplied without overflow. If an overflow is required they can be drilled on site. We can advise on how to do this and supply an exposed waste to suit. Contact us for more information.

Add a splash of Colour

Code BAZ901

For those who like something a little bit different, we offer a bespoke bath painting service on our roll top baths. Choose your own paint colour to match your scheme from manufacturers such as Farrow & Ball, Little Greene and Mylands Paint.

Whichever paint you choose it must be available in an Exterior Eggshell finish and fit for purpose. In addition to these paint ranges, we can also paint your bath in a choice of RAL Classic colours or British Standard colours. We also have a digital scanning service for colour matching. Please contact us to check the suitability on any of the above.

Please allow 14 working days for delivery of your painted bath.

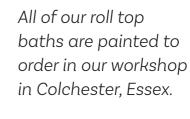

CLASSIC ROLL TOP

- Our in house specialist will key the bath first and then coat it with a water based primer/sealer.
 Using a roller the bath is then painted with 3 or more coats of the chosen colour.
- We use an Exterior Eggshell paint which has a 20% sheen finish.
- The paint is durable, eco-friendly and has a breathable finish.
- Resistant to flaking, peeling and colour fade for up to 6 years (providing care instructions for the surface are followed).
- $\boldsymbol{\cdot}$ Water and fungal resistant.
- Washable and wipeable.
- The bath will go through several processes, being quality checked all the way so we can ensure a perfect finish.

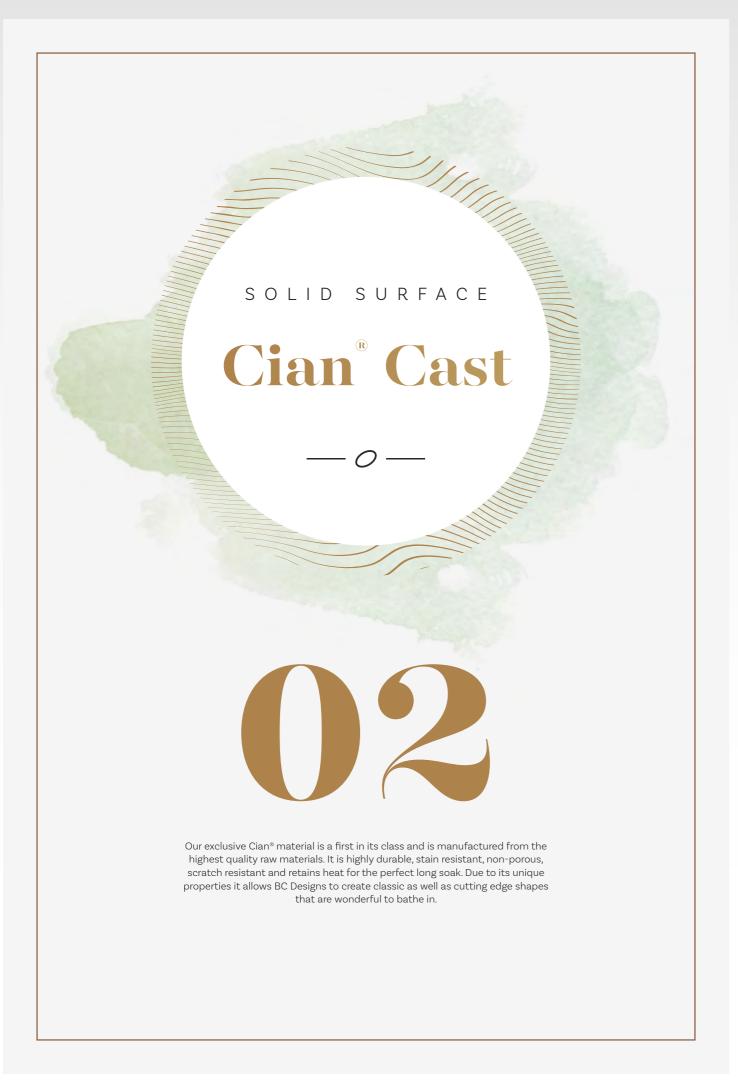

Not

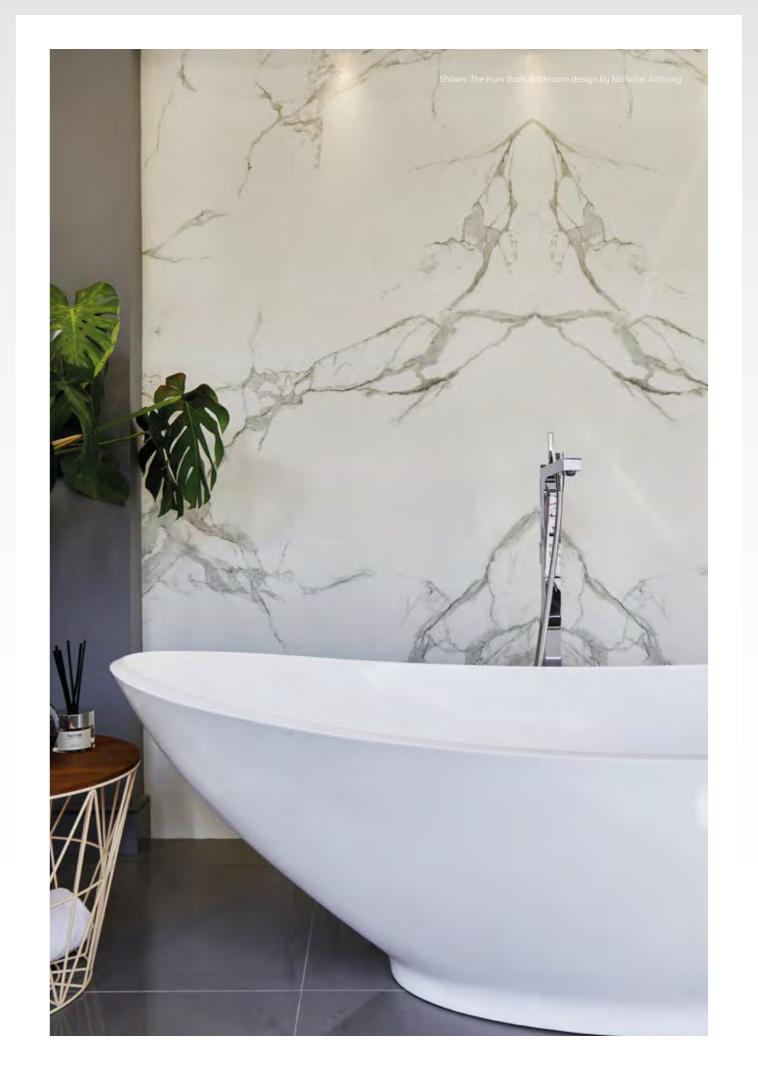

This colour chart is only representative of the final paint finish. Please refer to the paint manufacturers chart for an accurate finish before ordering.

Full colour swatches can be ordered directly from the Farrow & Ball or Little Greene Paint Company websites. RAL colours also available

Our painted Boat bath is a bespoke product and we cannot accept liability for colour chosen. It is the customer's responsibility to check the paint before ordering. We are unable to accept returns on this basis.

Durability

Cian® Solid Surfacing will withstand the rigors of everyday exposure.

Overflow

Unlike many free-standing baths on the market, most of our Cian® baths are available with overflows to meet build regulations and to give piece of mind. Please always check the specifications before ordering.

Non-porous

Unaffected by fluctuating moisture ingression and humidity, Cian® Solid Surfacing is for all practical purposes. 100% non-porous.

Polished finish

Our material does not have a deceptive gel coat and is hand polished for a luxurious shiny finish. A few of our models are also available in a silk matt finish.

ColourKast

Fancy a bit of colour? Something different? Our unique range of ColourKast shades are now available to order on most of our Cian® bath designs. Choose from eight distinctive colours, including Gunmetal, Satin Rose and Khaki Green.

Thermal shock

Cian® Solid Surfacing complies with Din 198 thermal shock standards and can be placed on heated floors.

Made in South Africa

All of our Cian® solid surface baths are manufactured in our exclusive factory in Cape Town, South Africa. We use the best and most meticulous techniques to create a material that is free from imperfections and polished to a premium finish.

Easy maintenance

A daily wipe using a non-abrasive cleaning agent will keep the surface clean. It is resistant to deterioration and minor damages can be polished or repaired.

Aurelius

Inspired by the fireclay baths of the early 20th Century.

The hand-finished Aurelius is made from a single, solid casting, using a composite material for durability and heat-retention.

Our Cian baths come without a waste. We now have a number of waste options and finishes to suit so please see product details and page 92 for more information.

The provenance of this product is reproducing the authentic look of early 20th century manufacturing. There will be slight undulations and blemishes in the finish and these should be viewed in this light.

Bampton

Inspired by the early 20th century fire clay baths.

Bampton is made from our unique Cian® material for better durability and heat-retention. It has a very large bathing area, due to the thin rim achieved in this single casting, yet is a space saver at only 1555mm long. The Bampton comes in a hand polished finish.

Our Cian baths come without a waste. We now have a number of waste options and finishes to suit so please see product details and page 92 for more information.

Code BAB135

Important

- 1. It is not possible to fit an overflow filler to this bath.
- 2. The provenance of this product is reproducing the authentic look of early 20th century manufacturing. There will be slight undulations and blemishes in the finish and these should be viewed in this light.

Crea

The perfect egg shaped bath.

The Crea bath is versatile bath that suits compact and generous spaces alike. It is cast in Cian® and hand finished for a luxurious bathing experience.

Important

- 1. There is a limited void under this bath, therefore the trap and waste will need to be installed under floor level. If this is not possible there is a separate plinth available to raise the level of the bath. The plinth and bath must be ordered together as they are individually matched in our workshop.
- 2. This bath has an overflow built into the side.
- 3. It is not therefore possible to fit an overflow filler to this bath.

Tasse

Delicately simple.

The oval Tasse bath's delicately simple design is coupled with a generous bathing area and all the properties of BC Designs' exclusive Cian® material.

Our Cian baths come without a waste. We now have a number of waste options and finishes to suit so please see product details and page 92 for more information.

Key features and benefits

- It is a colour throughout material providing all the incredible benefits of solid surfacing.
- · Cian® Solid Surfacing's superior process technology ensures a solid homogeneous, 100% non-porous surface.
- All products are renewable and repairable due to the impermeable surface. Minor scratches and scuffs can be easily removed.
- · ColourKast baths are manufactured with a silk matt finish only - white versions are available in a polished finish.
- Most of our Cian® baths have a unique integrated waste overflow system built into the walls of its baths.
- · All products carry a 25-year warranty.
- · Cian® baths can be fitted on heated floors, unlike many models on the market.

How to order ColourKast

Most Cian® baths can be ordered in ColourKast - and at the same price as White! Simply state your bath's product code and add your finish to the end to order.

For example: Vive Bath in Industrial Grey - BAB064IG

Matching ColourKast wastes can be ordered to suit - as well as various plated finishes. All ColourKast baths and basins are manufactured in a Silk Matt finish only. While we endeavour to hold stock of most baths please allow up to 10 weeks for delivery for some models. Check with us which baths we have in stock before ordering.

One piece look

Although double skinned acrylic, our Acrymite® baths have no unsightly join marks for a premium 'one piece' look.

Overflow

Our Acrymite® baths are available with overflows to meet building regulations and to give piece of mind. A select few of our baths have the option of an overflow filler.

Easy maintenance

A daily wipe using a non-abrasive cleaning agent will keep the surface clean. It is resistant to deterioration and minor damages can be polished or repaired.

Heat retaining

Our Acrymite® baths retain the heat of the room for a comfortable bathing experience.

Guarantees

Acrymite® baths have a ten year guarantee and will retain their original beauty for many years with minimum maintenance required.

CONTEMPORARY ACRYMITE®

ACCESSORIES & BRASSWARE

Our showers

The BC Designs Victrion shower valves are not just good looking! Our twin, triple and dual control shower valves are manufactured in the UK by a dedicated team. By installing one of our shower valves, you can enjoy the following benefits:

Industry certified

Our concealed twin, triple and dual control shower valves are TMV approved.

All thermostatic valves are WRAS approved.

TMV2

TMV2 approval means the shower will maintain the preset temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding. Only concealed valves are TMV Approved.

TMV3

TMV3 approval means that the shower meets Government health & safety requirements for use in public places such as schools, hospitals etc. Together, they ensure that our showers offer peace of mind and safe showering for all the family. Only concealed valves are TMV Approved.

Safety for all the family

- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate.
- Full thermal protection to prevent scalding even in the event of hot or cold water failure.
- In the event of hot or cold water failure, the valve will shut down the water supply.

Reliability

See website for exact flow rates of individual valves.

- · Accurate flow control.
- Excellent flow rates even at low pressure. Victrion showers can deliver 5.5 ltrs of water per minute at 0.1 bar pressure.
- The patented thermostatic cartridge is highly resistant to calcium build-up even in hard water areas.

Ease of installation

BC Designs Victrion thermostatic shower valves, contain a patented cartridge, which makes them simple to install and easy to maintain after installation.

The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace.

Guarantee

Victrion shower valves come with a 10 year guarantee. Visit our website for terms and conditions.
